TRAINING PROGRAM (VERSION 3.X)

Training Program Overview – Perspective VMS™

Thank you for selecting **Perspective Video Management Software (VMS) Version 3.x**.

This document is designed to provide a brief overview of what items can be expected to be covered from our Technical Training course catalog for Perspective VMS.

1. Introduction

Perspective VMS Version 3.x is the next generation platform of Video Management Software from LENSEC.

1.1. Scope

The trainings described/outlined herein are designed for certified LENSEC resellers and representatives. The general scope includes instruction on installation, configuration, and maintenance of Perspective VMS. Ancillary topics covered include configuration and setup of standard IP cameras and Windows Server/Workstation platforms.

2. Training Offerings

2.1. In-person Technical Training

LENSEC offers a full 2-day technical training for partners several times a year. These trainings are hosted in our corporate headquarters[1] in Houston, TX or various regional locations.

Houston, TX	Regional	Live Web Training
May 18-19 (LENSEC HQ)	June 20-21 (Pittsburgh, PA)	May 30 (Workflows Configuration)
July 18-19 (LENSEC HQ)	September 25-26 (ASIS 2017 – Dallas, TX)	June 13 (Camera Viewer Module)
August 22-23 (LENSEC HQ)	October 9-10 (Baltimore/Washington)	June 27 (User Administration)
October 24-25 (LENSEC HQ)		July 13 (Workflows Configuration)
November 14-15 (LENSEC HQ)		August 8 (Server/Client Troubleshooting)
December 7-8 (LENSEC HQ)		September 12 (Cameras Administration)

*Dates are subject to change. Additional dates may be added, please refer to www.LENSEC.com for the most up-to-date schedule.

2.2. Remote Technical Training

LENSEC offers custom technical training delivered via a web-based meeting platform several times a year. These trainings are shorter in scope than our traditional in-person training and are designed as an educational resource for advanced technicians. The focus is primarily on Perspective VMS operation and configuration. A general knowledge of IP networking, Windows-based Operating Systems, and Microsoft SQL database implementation is expected.

2.3. Live Web Training / Online Academy

Live web-based training will be held on select aspects of Perspective VMS and/or Video Management in general. These sessions will assist in completion of LENSEC certification for technicians where travel may be prohibitive.

3. Training Materials Registration

3.1. Student Materials

It is suggested that course attendees come prepared with a laptop in order to work individually with the software and course materials. Each course and academy session has a syllabus and course manual that will be delivered upon registration.

3.2. Registration

Specific details and individual registration for courses can be completed with the LENSEC Regional Sales Manager or online at www.LENSEC.com/training. LENSEC is located in the Westchase area with many adjacent Hotel/Lodging accommodations available.
