

VIDEO MANAGEMENT SECURITY INTEGRATED WITH GALAXY CONTROL SYSTEMS SOFTWARE FOR SURVEILLANCE

Cloud Concierge® provides full-featured, cloud-based access control services. When paired with LENSEC's Perspective VMS®, the unified security platform gives customers the opportunity to leverage powerful functionality across the entire enterprise. Either Cloud Concierge® or PVMS may be used as the primary software to monitor security system assets.

Perspective VMS® is certified with several hardware products and software applications. PVMS functions well with numerous physical security solutions. Here are a few with a proven track record.

- Active Directory
- RFID Asset Tracking
- Perimeter Alert Systems
- Alarm Monitoring
- Video Analytics
- Access Control Systems
- Data Storage
- IP-Device Alerting

SOFTWARE INTEGRATION

Software Integration extends the capabilities of Perspective VMS® by partnering with software companies and technology providers. Functional integrations unify the security interface into one platform that is easy to manage.

HARDWARE CERTIFICATION

LENSEC takes measures to acquire Perspective VMS® hardware certification with relevant manufacturers. Perspective VMS® has been certified by numerous physical security hardware companies on their hardware.

WORKFLOWS

Workflows enable users to integrate physical and logical inputs from physical security hardware into on-screen display actions or other notification alerts through associated objects, triggers, and actions.

SYSTEM HEALTH

System Health Notifications offer service alerts regarding servers, storage, IP-devices, and network services. Users may access tools and reports in order to help identify system health and faults.

GALAXY CLOUD CONCIERGE VIDEO INTEGRATION

FEATURES

- MOBILE APPS
- SMS/TEXT ALERTS
- LOGON ANYWHERE
- CUSTOM REPORTS

CLOUD CONCIERGE

ACCESS WITHOUT BORDERS

BENEFITS

- DYNAMIC MAPPING
- SCALABLE
- BROWSER-BASED
- ARCHIVE REDUNDANCY

Cloud Concierge® provides full-featured, cloud-based access control services. When paired with LENSEC's Perspective VMS®, the unified security platform gives customers the opportunity to leverage powerful functionality across the entire enterprise. Either Cloud Concierge® or Perspective VMS® can be used as the primary software to monitor security system assets. Users can keep an eye on employee use of access cards throughout the facility and access security video in real-time. True power is achieved when the systems work in unison to notify personnel about crucial events, calling up video as the event occurs. This provides opportunities to act upon notifications to sound alarms or lock/unlock doors.

Authorized personnel are able to access live and archived video, facility maps showing camera locations and views, while monitoring event activity from user dashboards. Event alarms from Cloud Concierge® will display as notifications in Perspective VMS®.

**SURVEILLANCE VIDEO MANAGEMENT
UNIFYING PHYSICAL SECURITY
ACROSS THE ENTERPRISE**

Since 1998, LENSEC has been a trusted security manufacturer collaborating with technology partners, such as Galaxy Control Systems, to provide a powerful unified security platform. We listen closely to our end-users and security integrators to follow the best practices and improve Perspective VMS® based on useful feedback.

LENSEC's enterprise-level video management software, Perspective VMS® provides real power alongside integrated security solutions. PVMS streams and captures IP security camera video and incorporates video analytics, access control, and more into the software.

-  ACTIVE DIRECTORY
-  GLOBAL SEARCH
-  DYNAMIC NAVIGATION
-  SITUATIONAL AWARENESS
-  HTML5 BROWSER-BASED
-  SIMPLE NAVIGATION
-  MULTI-VIEW MONITOR
-  REPORTING TOOLS

Galaxy Control Systems

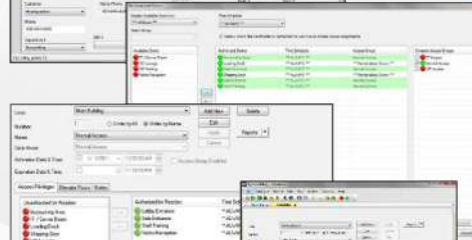

YOUR ACCESS TO INTEGRATED SECURITY SOLUTIONS

System Galaxy is a complete, enterprise-class access control and security management solution that offers unsurpassed ability to satisfy the requirements of any credential management, access control or security situation. With a user interface that's easy to operate and system features that deploy in any combination, Galaxy easily fits any customer.
